Your Comments:

I support the Draft's cleanup option "G" with amendments, namely that the goal of the cleanup must be to end the Fish Consumption Advisory, for all individuals, including breast feeding women, related to pollutants found in the Portland Harbor. The EPA must provide a date by which the advisory will be lifted.

It is highly irresponsible to rely on passive monitoring of the toxic sediment in an area known to be at high risk of a major earthquake within 50 years. The toxic sediment must be removed and the cost must be covered entirely by the polluters. It is grossly negligent, and vastly distorts the economic context of decision making, to shield the responsible corporations from these consequences.

Your duty is to protect the environment on which all life, and all economies, depend. You must act to protect the public's interest and uphold the public's trust. Remove the toxic waste, remove the fish consumption advisory, make the polluters pay.

Thank you.
